

Christopher L Plaisier, PhD

Assistant Professor, School of Biological and Health Systems Engineering

Arizona State University

P.O. Box 879709, Tempe, AZ 85281

Phone – (480) 965-6832 / E-mail – plaisier@asu.edu / Website – <http://plaisierlab.engineering.asu.edu>

Education:

Postdoctoral Fellow, Institute for Systems Biology, August 2009 – August 2012. Advisor: Nitin Baliga.

Doctor of Philosophy in Human Genetics, University of California, Los Angeles, June 2009. Advisor: Paivi Pajukanta, Dissertation Title: *Genetical Genomics Approaches to Familial Combined Hyperlipidemia*.

Masters of Science in Bioinformatics, University of California, Los Angeles, June 2009. Advisor: Steve Horvath, Thesis Title: *Transcription Factor Binding in a Familial Combined Hyperlipidemia Weighted Gene Co-expression Network*.

Bachelor of Science in Biology, University of Utah, May 2000.

Fellowships and Awards:

Science Communication Fellowship, Pacific Science Center, August 2015 – Present.

American Cancer Society Research Scholar Postdoctoral Fellowship, Institute for Systems Biology, July 2012 – July 2014. Project Title: *Constructing a Glioma Gene Regulatory Network*.

Genomic Analysis and Interpretation Training Grant, University of California, Los Angeles, June 2005 – July 2007.

Advanced Gene Mapping/Linkage Analysis Course Travel Stipend, Rockefeller University, Laboratory of Statistical Genetics, December 2006.

Research Experience:

Plaisier Lab Principal Investigator 2017-Current (School of Biological and Health Systems Engineering, Arizona State University).

Baliga Lab Senior Research Scientist 2012-2017 & Postdoctoral Fellow 2009-2012 (Institute for Systems Biology).

Pajukanta Lab Graduate Student 2004-2009 (UCLA).

Drews Lab Lab Technician / Lab Manager 2002-2004 (University of Utah).

Grant Support:

Ongoing Support

Pilot Grant ACE/NIH 06/01/18 – 05/31/19 Christopher L Plaisier (PI)

National Institutes of Health

“Quantifying population substructure to achieve adaptive therapeutic success”

This pilot project aims to develop single cell transcriptomic (sci-RNA-seq) technologies within my lab and the Arizona Cancer Evolution Center so that we can use this information to guide cancer patient treatment and diagnose why it failed.

Completed support

1U19AI106761-01: Pilot Research Grant 06/1/2016 – 05/31/2017 Christopher L Plaisier (PI)

National Institutes of Health

“Discovery of molecular switches mediating the transition to dormancy in Mycobacterium tuberculosis”

This project aims to systematically define network motifs in Mtb and how they contribute to the adaptation of Mtb to diverse environmental conditions during infection in the human host. Specifically, this pilot project will advance and generalize algorithms to characterize network motifs in Mtb, particularly those that act as molecular switches and mediate global physiological state transitions, such as entry and exit from non-proliferating states.

PF-12-264-01-DMC 07/01/12 – 06/30/14 Christopher L Plaisier (PI)

American Cancer Society

"Constructing a Glioma Gene Regulatory Network"

To construct a global transcriptional regulatory network (GTRN) from glioma patient tumors to identify disease related co-regulated gene clusters and the transcriptional regulatory factors driving their expression.

Service Activities:

Peer Review Referee

Biomedicine & Pharmacotherapy, BMC Systems Biology, Cell Systems, Journal of Theoretical Biology, Nucleic Acids Research and Scientific Reports

Working Groups

Co-Chair of NIAID Systems Biology Modeling Working Group

Teaching Experience:

- 1. Systems Biology of Disease (598/494), Professor – Arizona State University (Spring 2018):** Designed, developed curriculum, instructed and managed a two day a week graduate level course for the ASU Spring Semester 2018 on Systems Biology of Disease.
- 2. Systems Biology of Disease, Course Developer and Instructor – Institute for Systems Biology (July 2012 - Present):** Designed, developed curriculum, instructed and managed the week long Systems Biology of Disease course (<https://www.systemsbiology.org/course/>).
- 3. Systems Biology of Disease, Masterclass Instructor – University of Cape Town (August 2015):** Taught three day masterclass on patient stratification and biomarker discovery to 16 researchers from the University of Cape Town.
- 4. Introduction to Systems Biology using a Cancer Model, Fraser Lecture Series –Western Washington University (April 2016):** Taught a day long course on biomarker discovery in cancer for the Fraser Lecture Series at Western Washington University.

Volunteer Education Experience:

- 1. STEM Fellow, Industry Expert – Washington Alliance for Better Schools (Sept 2013-June 2014):** Advised 10th grade teachers on developing new curriculum around antibiotic resistance that met Next Generation Science Standards (NGSS) for STEM (science, technology, engineering and math) learning in Washington classrooms.
- 2. Science Communication Fellow – Pacific Science Center (October 2014 – Present):** Developed a lesson and activity that teaches young children to adults that come for Meet a Scientist Day how to create gene expression networks using an LED circuit board that I built representing a system of cell differentiation events.
- 3. Big Data Mentor – Washington State Board for Community and Technical Colleges (October 2014 – Present):** Developed a curriculum and instructed community college faculty on how to incorporate quantitative reasoning and big data into their classes by giving them access to environmental or patient cancer data they could use.
