CLIENT TESTIMONIALS

Kena! Your presence and all you contributed to the discussion at my presentation provided the perspective necessary to help everyone understand the balance of best practice online pedagogy as it relates to special populations and the mainstream learner population. Can't even begin to tell you how valuable that was for all of us!

Dr. Shawn Hrncir, 4/4/17

You are way too good. After talking with you, I get it now (finally). It is such a pleasure working with you to cross difficult tasks off my list. Thank you, Kena!!
